

**CREATIONIST**

**BIOLOGY**

**VOLUME 1**

## **PURPOSE OF THIS WORK**

The author's literary materials are not for profit, nor do they generate any kind of income. Book costs are solely to cover production, shipping, tax and reseller expenses. His satisfaction consists in contributing to the good of education, a better quality of life for all men and living beings, and to glorify the one Almighty God.

## **AUTHORIZATION**

The book may be reproduced and distributed by any means, used and translated by any religious, educational or cultural entity without the prior authorization of the author. All my books are in the public domain.

## Creacionist Biology - Volume I – Scribe of Christ

**AUTHOR:** Escriba de Cristo has a degree in Biological Sciences and History from the Metropolitan University of Santos; holds a degree in Business Management from UNIMONTE de Santos; he holds a Bachelor's degree in Theology from the Faculty of Assemblies of God in Santos; He has a technical training in Judicial Police from USP and two degrees from Harvard University in the USA on Pauline Epistles and Manuscripts from the Middle Ages. Professional broadcaster by Senac de Santos, recognized by the Ministry of Labor. Born in Itabaiana/SE, in 1969. In 1990 he founded the Universal Evangelism Center; today he dedicates himself to writing books and to the ministry of intercession. Having no interest in giving lectures or participating in events, avoiding social interaction.

**CONCLUSION..... 108**

## **INTRODUCTION**

I present to my readers another book that talks about the wonders of God in nature. Observing living beings and the laws of physics as well as the chemical elements I can say with certainty that an Almighty being built this universe. The theory of evolution hypothesis must be discarded and derided because there is not the slightest mathematical probability that such perfection exists because of accidental events.

Scientists should be ashamed before defending the theory of evolution. In fact, under Satan's rule, deans and scientific bodies do not even allow creationists to be called to university chairs. The secularization of the West has made us ridiculous. As long as this atheistic philosophy persists, we will only delay science and we will only go deeper into the fantasy of cosmic and biological evolution, a veritable house of playing cards. Nothing scientific, just assumptions and philosophical daydreams.

In favor of creationism is all the evidence in the universe that indicates a mind that planned all this. The trend is that the Intelligent Design hypothesis will continue to grow. The theory that life on Earth came from alien astronauts does not solve the great riddle of the universe, because the question will always remain: And who created the aliens? So God must be the cause of everything.

Someone bigger than infinity and older than eternity is the only plausible explanation for the universe.

There is only one answer to explain the universe: God. Skeptics accuse us of being simplistic. That it is very easy to explain the universe by saying that God made it. But that's it. God has left so much evidence that He exists, that He created everything and that He sustains the universe and life by the force of His power, that no one will be able to justify ourselves before Him when we are called to the Judgment. The arrogance of intellectuals does not allow them to agree that simple and illiterate people have reached the conclusion about the first cause of the universe, while they with so much study and measurements wander in vain theories. This book is a simple work in which I make my humble considerations about my beloved Creator whom He gave me the pleasure of seeing him in 1985 for over an hour. But this experience is private, I don't want you to believe me, but I think that all creatures need to believe in the one who made everything. Let's not shame our own intelligences, here's the evidence I expose.

## **1 - WORMS, WONDERS OF GOD.**

Everything that God created is good, says the Bible in Genesis 1:25. Even worms were created by God and are important in the planet's ecosystem, an example

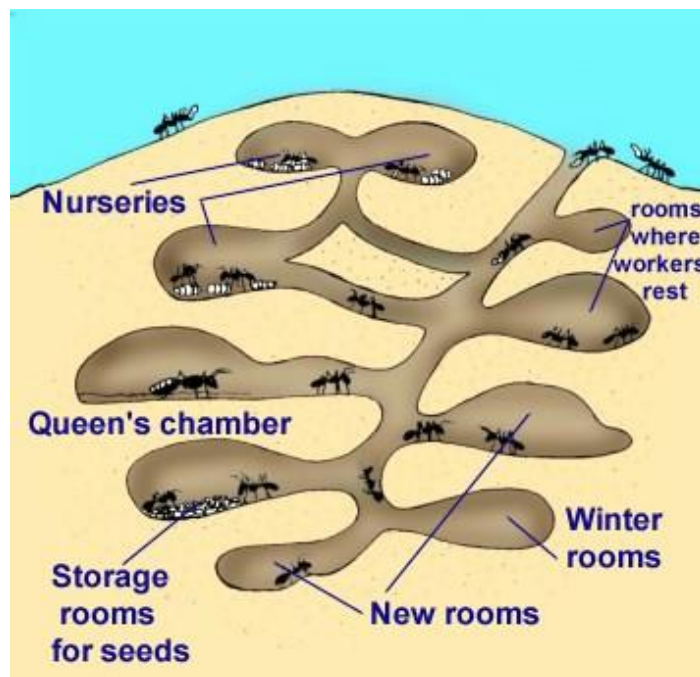

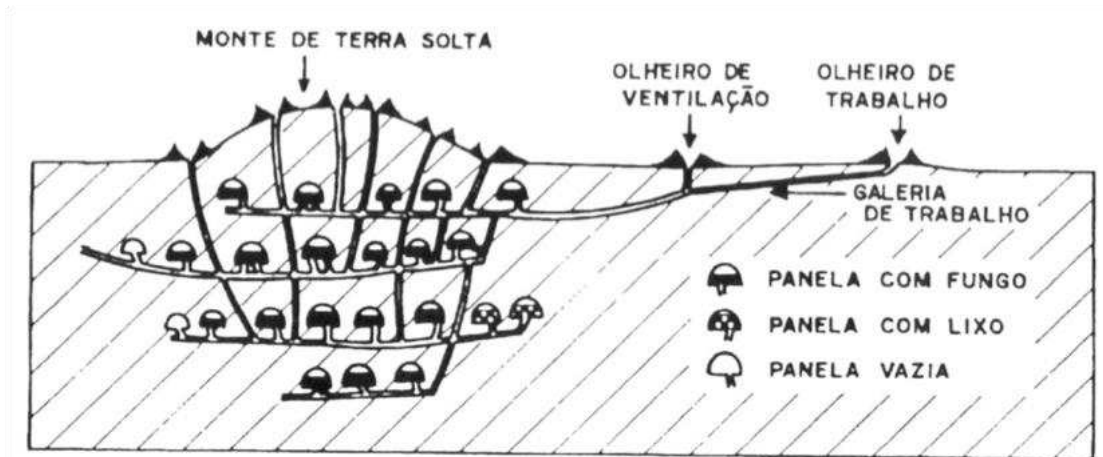

is the parasitic tapeworm antrobothrium that host sharks of the cacharhinus species. A balanced population of these parasites in the intestines lives stealing food that reaches the shark's body, but these parasites filter food by absorbing up to 455 times more toxic metals such as cadmium and lead than the shark host, providing a cleaning service that improves the health of the shark. shark. God created life in millions of ways to live in harmony, think about it.

## **2 - ANTHILL, WONDERS OF GOD.**

They are incredible metropolises, they have vegetable gardens, nursery, royal palace, garbage dump, cemetery, air pipes. They work day and night. The biggest anthill in the world goes from Portugal to Italy, making our

metropolises a joke. Ants constitute the most perfect civilization on earth. God placed the agropastoral mission only in man and ants. They plant fungi and breed foliates.

### 3 - TERMIT, WONDERFUL OF GOD.

Once again, human selfish thinking sees the termite as a pest that destroys furniture, but this creature of God was created to help in the fertilization of the earth. When eating diseased and dead trees, it fragments the matter, in turn the microorganisms, when digesting the smaller particles deposited by termites, end up releasing substances that fertilize the soil, such as nitrogen, phosphorus and potassium. No one can love the artist and despise his art. No one can love God and despise his creation.

## **4 - COLORS, WONDERS OF GOD.**

Have you ever thought if the world were black and white? But for some animals the world is like that, their eyes don't capture colors, and what's more, most living beings don't see anything as is the case with plants and

microorganisms. God created millions of colors to make life more beautiful. One of the things that God abused in the variety of colors is flowers, that's why flowers attract so much, it's not just the perfume, but also the colors that fascinate us.

But God gave each species a different ability to perceive colors. Dogs have a greater emphasis on yellow, cattle on red, and bees don't see white, so beekeepers' clothes are white. The light is of many colors. But we have the impression that it is white. Put a ruler towards the sun and you will be able to see the colors of the rainbow. Scientists are still debating whether colors are physical phenomena or just mental perception. Moral of the story: millions of colors we cannot perceive, just as some cannot perceive the Creator. God is always in front of us, but many don't realize it.

## 5 - PARTHENOGENESIS, WONDER OF GOD.

This scientific term means the rare phenomenon of a female ovulating or producing eggs that produce male offspring. Science has already proven in several species in which the female lays haploid eggs, generating males, as happens with some meloponini bees. God used this biological mechanism in which the Holy Spirit stimulated Mary's egg and she, even though she was not fertilized by a man, generated a male child since women only have the X chromosome.
