## Preface

I dedicate this historical book to people who can reason, use reason, have a critical thinking to understand what is happening in Eastern Europe and why the dispute between Europe and the United States of America, to occupy this territory.

I studied every step of the Russian government in the treaties on separatist territories and the involvement of the United States of America to prevent the fulfillment of signed agreements and the entry of some European countries sending money, weapons and mercenaries to prevent the agreements and with that to set up bases military to invade, subdue the inhabitants of the earth.

This was in the days when Rome dominated parts of Asia and the Middle East.

The senate authorized the invasion, kept part of the spoils, those who survived were brought to Rome and became slaves.

Today is no different.

In the name of the word democracy, they destroy lives and seize people's goods.

In this book you will understand what democracy is.

## CHAPTER I

### YEAR 2014

With the end of the Soviet Union, the countries that made up the Soviet nations assumed their commitments and duties to their partners.

The idea was that as freedom the government would have autonomy, but over time they saw that this was not the case.

The so-called cold war created sources of information from both Moscow and the independent republics.

The United States of America began to approach these now independent nations with logistics, money, training, and commerce and marketing. Moving the new states away from their origin and who they are is why the Ukrainians themselves don't even recognize who they are.

It's like brainwashing.

Note. The United States of America has invested many thousands of dollars in mind control for the purpose of controlling minds through messages, photos, repetitive reporting and declaration.

Note that the parties involved do not accept arguments and only acknowledge what they say.

Everyone talks and defends the same things.

The idea is to impress the domain on the entire population's mind.

In fact, they are not false reports, but false news, manipulated, distorted reporting, which, once repeated, enters the mind of the person who considers them to be true, even if it is a lie.

In modern psychiatry it is found as destroyed capitalist, where people use every marketing strategy to print their ideas and how to get mastery of the mind.

To order the troops to execute young people, old people without any justification, sabotage, explode and tell the media that it was not them but the adversary, you have to distribute a lot of cocaine, amphetamines, acids to the troops, because during the time in which the person is under the influence of drugs, they can execute, sabotage, poison, bomb everything and everyone, even if later he can't stand what he has done and commits suicide.

Every war is a domain of force.

The nation that does not have a large atomic arsenal will always be harassed and persecuted.

Capitalist rule does not forgive.

Since 2014, the Russian government has observed, as the US government has approached Ukraine with offers of financial, military support, training so that in the near moment it could prevent Russian advance in world markets.

Because of the facility offered to the Ukrainians, the population without understanding, without at least researching the dominion of the Americans and Europeans in Iraq, Syria, Afghanistan and how far the agreements signed by these powers go.

Capitalist rule is wild.

It does not respect color, creed, ethnicity and personal values.

It is the form of structural racism.

It's the prejudice that, if it's not me, it's not for anyone.

This concept of inferiority is seen today in the great economic powers, governments, great journalistic and statistical companies, it is the active form that will soon disappear.

The market is global.
